Emergency Hard Drive Recovery

Do you have a corrupt hard drive or one that no longer mounts? Did you accidentally delete files on your computer? Are other utilities failing to recover your data? Data Rescue II is the best hard drive and file recovery software for the Mac. Works even when your hard drive fails to mount or boot. Data Rescue is the most-awarded, most-used drive recovery

software for the Mac. Data Rescue is even used by data recovery specialists, forensic recovery teams and IT groups worldwide. Data Rescue II is hard drive recovery in a box!

You will need to save your recovered files to either an internal or external hard drive (USB or FireWire), removable media device (such as a Zip or MO) or a networked drive.

An optional emergency bootable CD is available.

Why is Data Rescue II different?

Focusing on data recovery, instead of hard drive repair, Data Rescue II will work in more cases, recover more effectively, and deliver your files in better condition than other utilities you may have tried in the past.

Data Rescue II analyzes your entire hard drive looking for your data, then it meticulously re-assembles your files and stores them to a different location.

Why do I need Data Rescue II?

- If your hard drive won't mount.
- If your hard drive is corrupt and you can't access files from it.
- If you have deleted files that you need to recover.

Hard drive recovery in a box

- Award-winning software, works when other utilities have failed.
- Recovers all types of files from your hard drive
- Works if the drive fails to mount or only partially operates.
- Recovers deleted files.
- Recovers digital pictures from your camera media even after it has been erased or reformatted.
- Recover your whole drive or just the files you need.
- Clone a drive that is about to physically fail and do the recovery from the clone.
- Leaves the original drive untouched to preserve data.
- Bootable emergency disc included.
- Recovers pictures, movies and music from Mac and PC drives, iPods®, cameras, and any type of digital media card.
- Professional results, yet easy to use.
